

Cambridge Biomedical continues its platform expansion strategy with the addition of the Luminex® FLEXMAP 3D® System with xPonent® software. The FLEXMAP 3D system combines differentially dyed fluorescent microsphere sets with an innovative instrument design to allow multiplexing of up to 500 unique assays within a single sample, both rapidly and precisely. This capability enables Cambridge Biomedical to deliver additional capacity to our clients for assay development, optimization, validation, and diagnostic testing under GLP and CAP/CLIA regulatory conditions.

In addition to Luminex our technology platforms now encompass:

- Flow cytometry
- HPLC
- MSD
- ELISA
- RIA
- PCR
- IHC
- Spectroscopy
- Colorimetric
- Cell based assays
- Cell culture
- Microbiology

Since its establishment in 1997, Cambridge Biomedical Inc. has delivered the capabilities and expertise necessary to develop, optimize and validate assays that meet and accelerate your clinical initiatives. Our CAP accredited, CLIA certified and GLP compliant central laboratory enables us to provide a full service to our clients with the capacity to test any matrix or quantity of samples.

To learn more please contact us at salesinfo@cambridgemedical.com and we will get back to you within 24 hours.
