

Spring 2013

Cambridge Biomedical continues its technical publication program with Flow Cytometry white paper

Cambridge Biomedical released four white papers in 2013 covering scientific topics of interest to our clients.

- **Luminex Technology by Dr. Sonal Gupta**
- **High Performance Liquid Chromatography by Dr. Sonia Taktak**
- **The Art of Auditing Bioanalytical Laboratories by Manish Ranjitkar**
- **Flow Cytometry-Getting the most information from cells by Maloy Mangada**

Cambridge Biomedical Updates

BIO2013 Symposium

We attended the BIO2013 Symposium in Chicago and had a very successful show. Always a pleasure to see our clients in person and to meet new people. We are looking forward to seeing you all again next year in San Diego.

iPhone and iPad App Release

We have been working on improving our mobile presence and are pleased to introduce our iPhone and iPad App specifically targeted at our clients needs. [Download now from the Apple® App Store](#).

Technology in the news

Cambridge Biomedical continues to broaden its technology base by adding the latest generation Luminex FLEXMAP 3 Systems. To read more please [click here](#).

The One Fund

Cambridge Biomedical is a proud member of the local community and we were all deeply affected by the terrible events at the Boston Marathon. Although our facility was closed for a period, we appreciated the forbearance of our clients and the efforts of everyone to work through the backlog. Cambridge Biomedical was proud to raise over \$900 for The One Fund and our thoughts are with everyone affected by this tragic event.

Continued Expansion

We continue to expand our scientific and program management expertise and have substantially added to our capabilities with the addition of the following staff:

Research Associate (3)
Scientific/Clinical Project Leader
Program Manager Associate

We are a growing company, please [click here](#) to see our most recent job openings.
