

Cambridge Biomedical Announces State-of-the-Art Platform Addition

Cambridge Biomedical continues to invest and broaden its range of analytical instrumentation with the recent installation of the MSD SECTOR® Imager 6000. This instrument is the newest member of the award-winning SECTOR Imager line from MSD and uses an ultra-low noise CCD camera with custom-designed telecentric lenses for rapid detection in all MULTIARRAY® or MULTI-SPOT® plates.

For more information on how we can assist you with your bioanalytical assay development, validation and optimization using the MSD SECTOR® Imager 6000 or any of the wide range of other platforms we support please contact us at salesinfo@cambridgebiomedical.com

Cambridge Biomedical professionals are experts in providing bioanalytical services from preclinical through phase IV clinical trials. We have a proven track record of success in complex, custom biomarker and assay development, optimization, validation and sample testing. We provide a diverse range of simple to highly complex, routine to esoteric, assays; and, we can accommodate study sizes with low, medium, or high volume sample testing requirements. Since 1997, Cambridge Biomedical has validated and placed into commercial diagnostic use over 150 assays across a wide variety of disorders.
